

Trusted Electrical Partners to the Aggregates & Cement Industry

Driven by Excellence. Powered by People. Focused on Safety. Built for Growth.

Supporting the UK's heavy materials sector since 1997

Process Control Services (PCS) UK Ltd has been delivering specialist electrical services to the Aggregates & Cement industries in the UK for over 25 years, working across 100+ sites nationwide.

Industry relationships that matter

We proudly work with the UK's top five heavy building materials suppliers, alongside their associate and subsidiary businesses:

Tarmac | Cemex | Holcim | Breedon | Heidelberg Materials

Proven expertise across every environment

From hot asphalt to stone-cold stone, our engineers support operations across the full range of heavy building material production, including:

- Quarry operations including crushers, screens, conveyors, dust suppression, weigh-bridge and all aspects of moving stone
- Cement kilns including all quarry operations
- Asphalt plants and ATEX installations
- Rail depots and marine terminals, blowers and ship-to-shore systems
- Block plants, packing plants and automated control systems
- All power, power management, lighting, CCTV, EV and data requirements for a safe and efficient site

We also provide embedded electrical teams, delivering reliable, on-site support where it matters most.

Comprehensive electrical solutions

Delivering end-to-end services tailored to demanding, safety-critical environments including:

- DSEAR & ATEX solutions for hazardous areas
- Inspection, testing & planned maintenance
- Major Electrical and data installations & CAPEX projects
- Lifecycle asset replacement
- Design and manufacture Electrical Control Panels

Our teams work closely with site personnel to enhance safety, ensure compliance, and deliver projects efficiently, from initial installation through to long-term operational support.
